

Team Feud Game - Rules and Points Distribution

Game Rules:

1. The game consists of multiple questions, each having multiple possible answers.
2. Players take turns to guess the top answers for each question.
3. Each question has a total of 100 points distributed among its answers.
4. Each team takes turns to answer the question. If the answer is correct, the team earns the points associated with that answer.
5. If a team makes an incorrect guess, they receive a strike.
6. Each team can receive a maximum of three strikes per question.
7. After receiving three strikes, the team's turn ends, and the other team gets one chance to steal the points by providing a correct answer.
8. If the other team successfully steals the points, they earn all the remaining points for that question.
9. Players can move to the next or previous questions using navigation buttons.
10. The team with the highest score at the end of all questions wins the game.

Points Distribution:

1. Each question is worth a total of 100 points, which are distributed among the possible answers.
2. Points for each answer are based on the popularity of that response. The more popular the answer, the higher the points awarded.
3. When a team guesses a correct answer, they earn the points associated with that answer.

4. If a team receives three strikes, they lose their chance to earn more points for that question.
5. The opposing team then gets one chance to steal all the remaining points by giving a correct answer.
6. If the opposing team fails to steal the points, the round ends with no additional points awarded.

Good luck and may the best team win!
